

ABOUT US

Clydesdale Engineering is a UK based manufacturer of **Engineered Products and Fabricated Assemblies** for the **Defence, Off Highway, Automotive and Industrial** sectors.

From our manufacturing facility in the **West Midlands**, we have been supporting customers with Engineered Products and **Exporting Globally** since the 1920's.

Working in **Partnership** with our **Customers**, we provide **Design, Engineering and Project Management** support to take products from **Concept** through to **Production**.

CLYDESDALE PRODUCTS

Shock & Vibration Isolation

Lever & Pedals

Fabrications

Pressings

CLYDESDALE PRODUCTION PROCESS

Fabrication

- Fibre Laser Cutting
- CNC Brake Presses
- Manual Mig & Tig Welding
- Robotic Mig Welding
- Manual Projection Welding

Presswork

- 30 x Manual Presses 40T to 800T
- Progression Presses 80T to 500T

Assembly

- On site assembly
- In house Engineering teams providing Design, Manufacturing Engineering and Quality Support
